When I first thought about purchasing satellite radio, I knew that I would be paying for a service that I might have gotten for free. But even that did not stop me from completing my purchase of a XM radio set. I am thrilled about all the different channels I am able to receive, including the weather and traffic reports!! I pay for these services, so that I may benefit from them at anytime or anywhere, coast to coast!! Why should the NAB be able to dictate to the satellite providers what they may or may not transmit, as long as we, the public, are willing to pay for these services!! What the NAB is trying to do is to censor the providers!! This is as asinine as if the Television Broadcasters wanted to censor the cable industry for showing nudity and using foul language!! Totally absurd!! I strongly urge the FCC to reject the NAB's request for Petition 04-160. I support the satellite radio industries right to provide the kind of programming that I, a paying subscriber, demand and deserve!! HANDS OFF MY XM RADIO!!!!!!
